Congratulations!!!

Respected Principal,

First of all, we wish heartiest Congratulations to your school for getting shortlisted under the Atal Tinkering Lab (ATL Scheme of NITI Aayog, Govt of India.

We are happy to know you that your school is taking such a good Initiative for the development of future capital of India. Aim Technologies is the part of “GeM Listed Vendors” for ATL equipment by NITI Aayog to setup ATL. Tinkering lab is a revolutionary platform in the field of medical science and engineering technology which plays vital role in the foundation study of students in schools. AIMTECHS is leading Indian Manufacturer for 3D printers and electronics equipment. AIMTECHS has a vast potential expertise in the field of science and technology, due to its manufacturing base would help school in all its activities of Industrial Tie-ups, and Expert sessions for students in your school.

KEY REFERENCE POINTS

Flexible Seating - A modular approach is a major advantage - flexible/movable furniture can be easily and quickly moved to suit the requirements of any lab activity.

Safe keeping of tools - Tools are the assets of the Lab. Please arrange for them to be kept safely. There are multiple ways to store tools - you can arrange them based on the availability of space. Hang them on pegboards, store them in boxes, bags, or chests, or keep them in drawers or in dedicated clearly marked shelves.

Security - Ensure there is a proper locking and security system in the lab to keep your tools and material safe at all the times.

Arrange all the tools and materials in a way that they are visible and easy-to-find - design a system to stock all the resources alphabetically or group wise. Use transparent boxes and drawers.

Organize the Lab in such a way that it is tidy and spacious enough to provide sufficient room to move around freely and without danger. Keep pathways to tools, exits, and safety equipment clear. Lab should be well-lit and ventilated.
